

Booster Pumps

DEALER INFORMATION

Designed & Manufactured by R Braun Inc.

Pump Trailers

The R Braun Inc. Booster Trailers were pioneered and designed based off our first hand experience with in field application. Our trailers paired with Mobilestar™ pump controls are proving to be a very attractive, cost effective package. Our trailers are completely customizable to meet your system's needs. We offer Cummins and Cat Tier4 power units, but we will always welcome building booster trailer assemblies using customer supplied motors.

- Custom built trailers to meet your needs and specifications.
- Set up as a lead or booster pump
- Hydrostat feeder systems available
- Single or tandem axle HD trailers available.
- Optional high speed flotation tires

- Low Boy/Hydraulic lift booster trailer option available
 - Sets the frame on the ground to get hose hook up low & minimize trailer vibrations
- Custom units available to meet your needs

MOBILESTAR™

Mobilestar™ is a simple, user-friendly pump control platform with all the bells and whistles you may need in day to day operations! With Mobilestar™ being the first to the manure pump control market back in 2009, it has the experience needed to be one of the top pump control systems available today. It is compatible with any device with internet connection and has instant pump responses, allowing us to monitor/check pump units remotely.

- *Start/Stop engine*
- *Monitor pressures with auto-throttle feature*
- *Real-time asset tracking*
- *Remote knife-gate control*
- *Hydrostat feeder control*
- *Maintenance tracking*
- *Mechanical or electronic engine compatible*
